Light Corporation's task lights are currently compatible with the systems listed above. If a manufacturer or system is not listed here, contact Light Corporation for availability.

### Important mounting notes:

System codes marked with "\*" - specify a task light that is 6" shorter than the shelf / overhead that it will be mounted in. For example, a 30" shelf would require an MT5 24 or shorter or a VT24 or shorter.

System codes marked with "\*\*\*" - for a 60" shelf an MT5 60 will not fit. A VT58 must be specified for that application.

# Panel measurement guide

Use this guide to determine what size mounting brackets are needed to mount personal task light or ambient lights to a furniture panel. Use when the manufacturer and / or system name panel is not known or if system is not listed on page 58. This page may be copied and faxed in with your purchase order. A Customer Service Representative will contact you on availability.

- A \_\_\_\_\_
- B \_\_\_\_\_
- C \_\_\_\_\_
- D \_\_\_\_\_
- E \_\_\_\_\_
- F \_\_\_\_\_

### For mounting in the slotted standards:

- On the metal standard, measure distances A and B.
- Looking at the end of the panel, measure dimension C. This is the width of the panel skin.

### For mounting to the top of a panel:

- Measure the width of top cap, dimension D.
- Measure the height of the top cap, dimension E.
- Measure the width of the panel, dimension F.
